

A CERTAIN SUBCLASS OF MEROMORPHICALLY STARLIKE  
FUNCTIONS WITH ALTERNATING COEFFICIENTS

M.K. Aouf, H.M. Hossen and A.Y. Lashin

**Abstract.** Coefficient inequalities and distortion theorems are obtained for certain starlike functions with alternating coefficients. Further class preserving integral operators are obtained.

**MSC 2000.** 30C45.

**Key words.** Analytic alternating coefficients, starlike functions.
