

CONTENTS

A. Synthesis

- Adrian Petrușel: Fixed points and selections for multi-valued operators 3
Radu Precup: Continuation results for mappings of contractive type 23
Ioan A. Rus: Weakly Picard operators and applications 41

B. Papers

- Antal Bege: On multiplicatively unitary perfect numbers 59
Adriana Buică: Some properties preserved by weak nearness 65
Aurel Muntean: Some fixed point theorems for commuting multivalued
operators 71
Alina Sintămărian: Data dependence of the fixed points of some Picard
operators 81
Marcel Șerban: Global asymptotic stability for some difference equations
via fixed point technique 87
Chronicle 97
Book Reviews 101
