Abstract. In this paper, we establish a fixed point theorem for a strongly directionally non-expansive mapping on a non-empty closed convex subset of a Banach space.

Key Words and Phrases: strongly directionally non-expansive, ray, fixed point.

2000 Mathematics Subject Classification: 47H10, 54H25.

ACKNOWLEDGEMENT

The authors would like to thank the Referee for his/her valuable suggestions. Moreover, the authors are indebted to Dr. P. Veeramani, Department of Mathematics, Indian Institute of Technology Madras, Chennai - 600 036 (India) and Dr. S. Somasundaram, Department of Mathematics, Manonmaniam Sundaranar University, Tirunelveli - 627 012 (India) for the knowledge they have acquired from the meaningful discussions with them.
