**Abstract.** The aim of the present paper is to study isomorphisms of canonical  $\mathcal{E}$ -lattices. Some interesting results are obtained in the particular case of isomorphisms between two subgroup  $\mathcal{E}$ -lattices.

**Key Words and Phrases:** canonical  $\mathcal{E}$ -lattices, subgroup  $\mathcal{E}$ -lattices, isomorphisms.

**2000 Mathematics Subject Classification:** 06B99, 08A35, 20D25, 20D30.
