Abstract. The aim of this paper is to prove some new fixed point theorems in a nonempty closed convex subset of a Banach algebra satisfying a sequential condition (P) in a weak topology setting.

Key Words and Phrases: Measure of weak noncompactness, quasi-regular, weakly condensing, weakly sequentially continuous, relatively weakly compact, fixed point theorems.

2010 Mathematics Subject Classification: 47H08, 47H09, 47H10.
