Abstract. By constructing an equivalent operator and using fixed point theorem, multiple positive solutions for some fourth-order multi-point boundary value problems with nonlinearity depending on all order derivatives are obtained. The associated Green's functions are also given.
Key Words and Phrases: Multi-point boundary value problem, positive solution, cone, fixed point.
2010 Mathematics Subject Classification: 34B10, 34B15, 47H10.
